COMPANY ABOUT US

PPC is an alliance of industry leaders offering advanced solutions in energy, construction, pipelines, telecommunications, and water treatment. With decades of experience, we deliver high-quality projects from inception to completion. Our collaborative approach and commitment to innovation ensure future-ready, sustainable solutions. By combining technical expertise with cutting-edge practices, PPC continues to set new benchmarks in engineering and infrastructure development.

OUR COMPANY INFORMATION

"We go beyond construction, shaping a future built on innovation, integrity, and excellence. Learn more about our company."

Company Name	: Pioneers Paths Company
Tagline	: Uniting Expertise , Achieving Excellence
Year Of Establishment	: 2020
Founder	: Galal Elsayed
Phone	: +966502735584
Email	: Sales@ppc-saudi.com
Website	: Www.ppc-saudi.com

Mission

Our mission is to provide holistic, innovative, and sustainable infrastructure solutions that empower communities and industries. Through high-quality craftsmanship, safety, and a commitment to client satisfaction, we aim to transform construction, energy, and utility services, delivering projects that enhance societal well-being and environmental stewardship.

Vision

We envision a future where "Masarat Al-Awael" is the global benchmark for integrated infrastructure and construction excellence. By combining sustainability, cutting-edge technology, and a commitment to economic and environmental progress, we aim to create projects that leave a lasting positive impact for generations to come.

VALUES

Excellence and Innovation

Striving for perfection in every project by adopting cutting-edge technologies and modern engineering methodologies.

Integrity and Transparency

Conducting all operations with honesty, ethical standards, and open communication to foster trust with clients and partners.

Safety and Reliability

Upholding the highest safety standards to protect people and ensuring dependable services in every aspect of operations.

Sustainability and Responsibility

Building a future that harmonizes environmental care with economic growth, ensuring long-term benefits for communities and ecosystems.

Collaboration and Synergy

Harnessing the collective expertise within the alliance to deliver seamless, integrated, and impactful solutions.

Client-Centric Commitment

Tailoring solutions to meet client goals and aspirations while exceeding expectations with innovative and reliable outcomes.

"Delivering innovative and sustainable engineering solutions with precision and excellence to meet your project needs."

Electrical Energy Distribution and Management

- Distribution and retail/wholesale electricity sales.
- Import/export of electrical power.
- Project management for electricity generation and wholesale sales.
- Electrical system maintenance and service transactions.

General Construction Services

- Residential and non-residential construction.
- Government buildings, airports, and prefabricated structures.
- Building renovations (residential and commercial).

Infrastructure Development

- Roads, sidewalks, bridges, and tunnels (construction & maintenance).
- Railroad lines and airstrips development.

Pipeline and Utility Networks

- Installation of electricity, telecom, and utility pipelines.
- Oil, gas, and water pipelines construction and maintenance.
- Irrigation channels and water wells.

Utility Plants & Communication Networks

- Power plants, wastewater treatment, and telecom towers.
- Maintenance of water treatment and communication systems.

Industrial & Marine Construction

- Oil refineries, ports, and marinas.
- Dam construction and waterway cleaning.

Demolition & Site Preparation

- Building demolition and site excavation.
- Concrete foundation work and groundwater extraction.

Desalination plants and water stations

- Design, construction, and maintenance of advanced desalination plants and water stations, providing clean water through innovative treatment solutions.

Heating, Cooling, and Ventilation

- Installation and maintenance of heating systems (electric, gas, or oil-powered).
- Setup and upkeep of solar energy panels and systems.
- Plumbing system installation and repair for water supply and waste management.
